

Mini Coupe Cooper S R58 - Sports System (2011 on)

DETAILS

QuickSilver have developed a 'Sports' System for the Mini Coupe Cooper S.

The system is a 'Bolt-On' fit that exits in the original position and offers the driver Improved performance, an enhanced sports sound, reduced weight and a distinctive appearance allowing the owner to distinguish their Mini.

KEY FEATURES

- Larger upswept 'DTM' tail-pipes that fill the rear valance.
- A proper Cooper sound.
- Improved Performance, Dyno tests show 6 bhp improvement.
- Bolt-On fit - Precision engineered.
- Reduction in Weight.
- Suitable for cars that are enjoyed daily - high mileages.

6000rpm	85db	87dB

WEIGHT

Standard System	18 kgs	(~ 40lbs)
QuickSilver System	8 kgs	(~ 17.6lbs)
Weight saving	10 kgs	(~ 22lbs)

What are the benefits of a QuickSilver Exhaust System?

QuickSilver Sports Systems

- * Sound - To increase the fun
- * Reduced weight - saving up to 40 kilos
- * Improved performance - more efficient flow, reduced weight and improved heat dissipation all combine to improve real performance.
- * Appearance - Polished, linnished, ceramic-coated or raw

How long does it take to fit a system?

It will depend on the make and model and the experience of the fitter. Some of our more modern systems take as little as 45 minutes though some vehicles take longer due to the removal of other parts to gain access. Our classic systems may on occasion be more difficult and we always recommend installation by a professional technician.

How loud will it be?

Loudness is truly a matter of personal taste. We offer sound readings for many modern systems and categorise our systems as Heritage, Sports, SuperSports and SuperSportsPlus. As a guide Heritage is an exact replica of the original, our 'Sports' is for the car used everyday, our 'SuperSports' for the driver who enjoys his car mainly on the weekend or just for fun, and 'SuperSportsPlus' for the enthusiast who wants to optimise the experience.

Does it affect the cars warranty?

You have the right to use high-quality aftermarket parts and know that your new car warranty claims will be honored. In fact, your vehicle dealer may not reject a warranty claim simply because an aftermarket product is present. A warranty denial under such circumstances may be proper only if an aftermarket part caused the failure claimed. (CONSUMER BILL OF RIGHTS Article. 2)
