<b>Front Tower</b>	Q Towers 4 Pack
<b>Front Clips</b>	Q128-A
<b>Rear Clips</b>	Q128-A
<b>Crossbar Length</b>	48" CrossBar Pair (2 CrossBars)
<b>Recommended Fairing</b>	44" Fairing

## Measurements

## Notes

- 1** Canoes are limited to 14 feet or less on this application.
- 6** At the specified measurements, insert a plastic card under the trim to locate the hidden slot. Firmly press the clips into the hidden slot, using the plastic card to help leverage the clip into place. Download the supplemental instruction at [yakima.com/download/clubman.pdf](http://yakima.com/download/clubman.pdf) for further reference.
- 31** Maximum allowable weight load is 100 lbs. Load is defined by the total weight of the Base Rack, Mounts and gear.
- 81** All loads extending beyond the length of the roof (except luggage boxes) must be secured to both the front and rear of the vehicle, in addition to the rack.
- 103** Due to crossbar spread limitation, KayakStacker is not recommended on this application.
- 109** Always be sure to tie down your SUP as per instructions. SupPup and SupDawg require using nose tie down strap.
- 112** The sunroof/Panoramic roof should not be opened while the rack and/or gear mounts are installed. You may remove the rack when not in use.
- 132** Any load/mount extending beyond the rear hatch seam may cause interference.
- 145** Clips are installed in pockets on rooftop trim strip.
- 187** Boa bike mount will not work due to crossbar spread limitations.
- 191** Limited to 2 surf/sail/paddleboards. Boards must be stacked - NEVER carry side-by-side.
- 197** Foam blocks limit capacity to one boat per vehicle.

## Instructions

Locate pockets by sliding a credit card under the trim strip against the roof and referencing your measurements. Once located, insert clip with attached cam body then position rack on roof and thread adjustment bolt into towers to start the tensioning process.
